#### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

#### Status

- 1) Responsive to communication(s) filed on \_\_\_\_\_.

## DETAILED ACTION

### ***Specification***

1. Applicant is reminded of the proper language and format for an abstract of the disclosure.

The abstract should be in narrative form and generally limited to a single paragraph **on a separate sheet** within the range of 50 to 150 words. It is important that the abstract not exceed 150 words in length since the space provided for the abstract on the computer tape used by the printer is limited. The form and legal phraseology often used in patent claims, such as "**means**" and "**said**," should be avoided. The abstract should describe the disclosure sufficiently to assist readers in deciding whether there is a need for consulting the full patent text for details.

The language should be clear and concise and should not repeat information given in the title. It should avoid using phrases which can be implied, such as, "The disclosure concerns," "The disclosure defined by this invention," "The disclosure describes," etc.

2. The abstract of the disclosure is objected to because the term "means" appears in the text and the abstract is not on a separate sheet of paper. Correction is required.

See MPEP § 608.01(b).

### ***Claim Rejections - 35 USC § 112***

3. Claim 9 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

a. **Claim 9 does not modify or further limit the claims structure.**

**Furthermore the limitation is not even defined. Therefore the claim is indefinite.**

***Claim Rejections - 35 USC § 102***

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. Claims 4 and 6-11 are rejected under 35 U.S.C. 102(b) as being anticipated by Kang (2004/0123438A1).

Kang discloses the claimed invention as recited in the claims. Kang disclose a tool having a pair of pressure plates (4&6), a cam ((2) with a latch means (22), and means for rotating (21).

***Claim Rejections - 35 USC § 103***

6. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

7. Claims 1-3 and 5 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kang (2004/0123438A1) in view of Dube et al (5947449).

b. Kang disclose the claimed invention except for a ratchet and pawl mechanism.

c. It would have been obvious to replace the latching mechanism with another latching mechanism such as a ratchet and pawl mechanism as taught by

Dube et al for actuating the tool and it obvious to substitute one known working mechanism for another which would have yielded predictable results to one of ordinary skill in the art at the time of the invention. KSR

d. In regard to claims 1-3, It would have been obvious to try to use this tool to opening a hole in a brick wall because may tools such as hammers, picks, shovel and even spoons used by prisoners have been employed to open holes in brick walls. A person of ordinary skill in the art would have the technical grasp. This is likely not a product of innovation but of ordinary skill and common sense

### ***Conclusion***

8. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The 892 form discloses prior art being made of record.
